Summary

QA engineer who tests like a product designer. At Paceflow, an engineering-analytics SaaS, I run end-to-end QA on a TypeScript web app and Python backend and design the product itself, including the interactive prototype behind its open-source CLI dashboard. Computer Science graduate with prior remote QA work on Microsoft Power Apps and SharePoint, a .NET internship, and a trained illustrator's eye for visual detail.

Experience

Paceflow Apr 2026 – Present
Associate Product Developer & QA Engineer *Remote*

- Run end-to-end QA on new features and releases across the web app (TypeScript), backend (Python) and marketing site of a performance-review and engineering-analytics platform that integrates Jira, Linear, ClickUp, GitHub, Bitbucket and Slack.
- Find, reproduce and verify defects across the release cycle; file them in Linear with steps, expected vs. actual results and evidence, and confirm fixes on developers' GitHub pull requests.
- Designed the interactive prototype for `paceflow tui`, the terminal dashboard of Paceflow's open-source Rust CLI: four report views, keyboard and mouse navigation, and a threshold-only colour system. It is the design reference the production TUI implements (public repo).
- Redesigned Paceflow's landing page and main website; now designing its note-taking web experience.
- Turn testing insights into UX recommendations that shape product decisions; document test findings and designs in Confluence and coordinate with engineers in Slack.

CDI Tech Education Jan 2025 – Sep 2025
SharePoint Consultant *Remote (Wilson, Virginia, USA)*

- Tested and tracked defects in custom Microsoft Power Apps (filtering, note-taking and ordering systems) and SharePoint sites before handover to users.
- Validated functional reliability across the Microsoft 365 suite (Outlook, OneDrive, OneNote, Word, Excel, PowerPoint) and supported users on SharePoint solutions.

AFRICOM Technologies & BPO Services Aug 2024 – Feb 2025
.NET Developer Intern *Addis Ababa, Ethiopia*

- Contributed to .NET backend development and ran manual functional testing on internal e-commerce solutions, documenting and tracking defects within the company's ISO-certified quality process.
- Worked with MIS consultancy and IT audit teams on Single Window and BPO platforms, validating workflows, data integrity and user journeys.

Honors & Community

- **Finalist**, International Health Innovation Hackathon (2026).
- **Ambassador**, IDEEZA hardware-innovation platform (Feb 2026 – Present); participant, IDEEZA Gateway Challenge: AI-Assisted Hardware Innovation.
- Volunteer mentor to female students in database systems, networking and web development.

Skills

Testing:	End-to-end, functional, regression, exploratory, usability and cross-browser testing; test case design; bug reporting; release checklists
Product & UX:	Figma, prototyping, UX review, web and terminal UI design, illustration
Development:	HTML, CSS, JavaScript, Java, C# / .NET, PHP, SQL, Git
Tools:	Linear, Confluence, GitHub, Slack, SharePoint, Power Apps, Microsoft 365
Languages:	Amharic (native), English (fluent), French (conversational)

Education & Certifications

HiLCoE School of Computer Science & Technology Oct 2022 – Oct 2026
B.Sc. in Computer Science *Addis Ababa, Ethiopia*

- Coursework: Data Structures & Algorithms, Object-Oriented Design, Database Systems, Operating Systems, Networking.
- Certifications: Android Developer Fundamentals; Artificial Intelligence Fundamentals; Professional Development Skills for the Digital Age.
